

What is claimed is

1. A single-piece cover made from an integrated
(one-shaped) process for light guides provides first
space and second space to accommodate at least one set
5 of light guides and brightness enhancement films;
wherein

the single-piece cover is made from an integrated
(one-shaped) process leading no coming off or
separating due to external factors.

10 2. The single piece cover for light guide according
to claim 1, wherein several embedded slots are built in
the inner edge of first and second spaces of the
single-piece cover.

15 3. The single piece cover for light guide according
to claim 1, wherein there are inlays on the outer edge
of the light guide corresponding to first and second
spaces.
